family fun and get started on the projects listed below and have them ready in time for Valentines Day.

- 1.Help kids make their own Valentines using construction paper, lace, ribbons, sequins, buttons, glitter, glue and anything else they or you can think of to add on!
- 2.Cut a heart shape from a household sponge and sprinkle with wheat grass seeds and keep the sponge wet so the children will have a growing heart. They can even give the hearts "hair cuts!"
- 3.Make and decorate cookies or cupcakes. Use your favourite cake mix and icing and decorate with candy hearts, red hots, sprinkles and anything else you can think of.
- 4.Make a Valentine Box by decorating a shoe box with construction paper or wrapping paper and adding on lace, ribbons, paper cut-outs, heart doilies and anything else in your craft pile. Kids can then put their Valentine cards in the box!
- 5.Use paints or food colouring to make Thumbprint Valentines by making two thumbprints into a heart shape and then add facial features . The child then can add the following - "Thumb Body Loves You!"
- 6.Play Cupid Chase by putting blindfolds on all but one (He will be Cupid) Tie a small bell to the child's shoe strings or on a string for a necklace.

Then Cupid runs around the room anywhere while the blindfolded kids try to catch him by listening for the bell.

When Cupid is caught the catcher then becomes Cupid! Have a Happy Valentines Day!
